

KPA Automation View: Advanced Visualization Solution

KPA Automation View is a comprehensive software solution for creating advanced Human Machine Interfaces (HMI) for factory automation and production control. It is a powerful, highly-customizable, fully-programmable environment with truly unlimited possibilities for designing and programming even the most sophisticated applications with any desired appearance, logic and connectivity.

Key Features

- Unlimited data tags, screens and windows
- Supports third-party PLCs through OPC Classic, Modbus TCP or custom TCP-based protocol
- Advanced features: data storage and export, reporting, trends and charts and other
- User access control and logging
- Suitable for CFR 21 Part 11 compliant systems*

Design

- Design with KPA Automation Studio – powerful integrated development environment
- Object-oriented approach to all components
- Intuitive, drag-and-drop user interface
- Extendable library of controls, styles, and scripts
- Vector graphic editor
- Import/export of objects and resources

Runtime

- Static and animated graphics
- Unlimited screens
- Multi-HMI support
- Protected user actions log
- Script debugging
- Runs on Windows 7 and 10
